Fish Pathologists

Genomics of Fish Pathogens Workshop

Sunday 10th September 2023

At the 21st EAFP Conference Aberdeen 2023, we will be hosting a **Genomics of Fish Pathogens workshop** for early career researchers (ECRs). We are excited to give researchers who have no or minimal experience with doing bioinformatics their first shot at working with genomics data. You will start with learning basic command-line techniques, which you will then use to analyse bacterial pathogen data. The skills covered will help build a foundation for you to begin to tackle genomics data of different kinds.

Organisers

Ronny van Aerle (CEFAS, UK)

Nicola Coyle (CEFAS, UK)

David Ryder (CEFAS, UK)

Chantelle Hooper (CEFAS, UK)

Date

Sunday 10th September 2023. This is a full day workshop.

Location

P&J Live Event Complex Aberdeen (TECA), E Burn Rd, Aberdeen AB21 9FX.

- **Attendance & Cost**

Attendance is limited to 30 participants.

- Participants are expected to bring their own laptop, which does not have to be of a high specification. All analyses will be conducted on virtual machines (VMs) and further instructions on how to prepare your laptop to access these VMs will be provided prior to the workshop.
- £170 per person including VAT (costs includes internet access, coffee breaks and lunch)
